Patient Office Visits and Telemedicine during COVID-19 Pandemic

In response to the COVID 19 pandemic, we understand that most patients are practicing “social distancing,” and we are likewise offering flexible and new services to try to minimize patient encounters to our office, when feasible. While we are remaining open for our full clinic services at this time, we are taking measures to ensure safety of our patients and staff, including screening sick patients before entry, wearing personal protective gear during encounters with patients and sanitizing the office space throughout the day.

We will be rolling out a trial of telemedicine “virtual office visits” at this time for patients who need services such as: routine follow-up care without testing, lab results discussions, and other visit types (even some New Patient consults) that we feel could be suitably managed by a virtual consultation.

Please inquire with the staff for further details and specifics. We will be offering telemedicine via a nominal fee prepaid based on expected time and complexity of the encounter. We are proud to waive any costs for our veterans, as well as for our Medicare and other senior patients. We hope to quickly work to streamline our telemedicine service to be prepared in the event that the pandemic forces a temporary closure of some or all of our locations.

Blessings and prayers for us to get through this together.
